Department of Electrical and Electronics Engineering

Two days workshop on "Internet of things"

Department of Electrical and Electronics Engineering, Shri Shankaracharya Group of Institutions (FET), SSTC in association with IEEE Student Branch SSTC, **E-cell IIT Bombay** and **Robokart.com** organized a two days workshop on internet of things from 2-3 September 2016. The workshop was intended for the UG & PG students.

IOT is the concept of basically connecting any device with an on and off switch to the internet (and/or to each other). This includes everything from cell phones, coffeemakers, washing machine, headphones, lamps and almost anything else you can think of! Basically our device gets to synchronize with internet and work on its command, thereby making daily chores and tasks easier to us. IOT is the new era of technology which associates the innovative ideas to both hardware and software. As smart phones and internet are easily available, IOT provides a good platform for learning new things and its execution.
